Diamond Class

Today, we'd like you to watch the story of 'How to Catch a Star' by Oliver Jeffers, <https://www.youtube.com/watch?v=rpyR6hJPxiw>. It is a story of a boy who loved the stars so much, he decided to catch one of his very own.

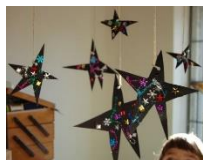

- Make a stargazing telescope from a kitchen roll tube and decorate it. Then you can use your telescope to look for your own stars to catch! Can you count how many stars you see in the night sky?

- Have a go at writing the letter 's' for star – if you can, write the whole word! Challenge – could you use a cotton bud dipped in paint to spot the word.

- Stars give us light at night. Can you find other things around your house which give us light and write a list of them?
- Create your own star constellation to hang in your bedroom – cut different sizes stars and decorate as you wish. Use paint, chalk, coloured paper etc

Have fun everyone!

Please remember to email your photographs to:
