

Online Learning: Thursday 14th January 2021

Years 1 & 2

Today, we'd like you to watch this curious George video
<https://www.youtube.com/watch?v=RbgeF3FDXWo>.

1. In the video George visits a very hot planet called Mercury. Why was this planet so hot? Write a sentence telling me why, you could even add a picture. If you get stuck, you could watch the video again.
2. Make some moon rocks (foil or paper) and have a throwing competition. Who can throw them the furthest? Your whole family can join in! The winner gets to fly the rocket.
3. You have crash landed onto a strange unknown planet. Take some photographs of what you see. Are there leaves, rocks, animals, aliens? If you do not have access to a camera, draw what you see.
4. Using materials from home, make a space helmet for your teddy so that you can take him/her with you on your next space mission. You could use recycled materials to help save the planet.
5. <https://www.youtube.com/watch?v=LZAaZDVqCiA> Click on the link to go on a journey with Mike the cosmic space monkey. Your teddy could join in too.

Remember to send photographs of you and your work to your teachers via email:

Miss Reid: ReidL36@hwbcymru.net

Mrs Rolls' Class should email: GriffithsS408@hwbcymru.net

Mrs Bowles: BowlesL21@hwbcymru.net

Have fun learning everyone!
