

Smartphone safety... can you make **smart** decisions?

Do you **really** know who you are messaging and sending pictures to on WhatsApp.

Remember only 'friend' and 'add' people you know in real life. If you are added to a WhatsApp group there could be people in that group that are pretending to be kids. They might try to be your friend, but you don't know them and they could be dangerous.

Only talk to or message people you really know.
